Customer Reviews

We're raising 5 pianists, all using the Piano Adventures series and they are all excelling at their own speed and ability. Great teaching tool with more theory overall than any other set I've seen. Our kids know things I was never taught about music and at such an early age. It's fabulous.

My boys use these books for piano lessons. They are easy to use and learn from and my boys have both learned a lot through this series of piano books. A must buy for any piano player learning to play.

My degree is a B.A. in Music Theory with an emphasis in Piano Pedagogy. I have taught piano to all ages, and I have also played professionally with various groups. In my 40 years as a musician I have never seen a piano method in book form that is as complete and well thought out as this one. I don't think anything else available would keep a student as engaged or produce a more well-rounded musician as this series.

My son used Bastien piano basic in the beginning when he was 3. A few months later after he finished level 1B, he transferred to Piano adventure (Lesson, Theory, Performance, Technic & Sight-reading), because his piano teacher was using it. It's well organized. We all like Piano adventure more, and my son loves to do theory book the most. His teacher teaches him Suzuki level 2 at the same time. Now he is almost 4 and half, he finishes Level 2A , half of Level 2B and half of Suzuki 2. I am going to buy Piano adventure Level 3A.

I like the Faber and Faber series because they present fundamental musical ideas in a systematic order, the songs are by and large interesting, and the pictures are well done. The music of course is the most important part, but the presentation can affect how the student frames the piece, mentally, which in turn affects how they approach it. I also like how they stress the identification of intervals in the accompanying theory book. Some other books don't stress this aspect of reading, but it is very useful for most students.

Arrived on time and in perfect condition. Great series for piano students. I have used these from the beginning with my kids and find them very easy to follow. They have very nice songs, and have a diverse collection of music.

Good song selections, progressively challenging lesson plan. My daughter really enjoys it. It motivates her to play regularly and she has been making solid improvements in her piano skills and music theory knowledge.

We ordered this because our son's music teacher asked us to. However, I prefer the music adventures to other music instructional books that I have seen. They seem rather kid and teacher friendly.
